## SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

**Due to backlogs and varying availability of media, customers will not be advised when orders are not delivered within the published goal periods. However, customers will be advised if any unexpected delay in their order has been identified. Customers should use the above actual days to mail for each product as a guide as to when they can expect their orders.**

Delivery of any specific copy will vary based on the availability of microfilm products and/or file accessibility. Customers are encouraged to fax orders for copies directly to Certification Division at (703) 308-9759 and to pay by PTO Deposit Account, MasterCard, or Visa. ### Notice of Change in Procedures for Recording Inventors' Names

The Patent and Trademark Office (PTO) has received a number of complaints from the public regarding improper truncation of inventors' names as printed on the Letters Patent. Changes on the printed patent currently require the filing and processing of certificates of correction. In an effort to address these complaints, the PTO has decided to change the method of recording and printing inventors' names on the Letters Patent. This change in the manner in which inventors' names will be printed on the Letters Patent is not to be confused with an actual change in an inventors' name as it appears on the oath or declaration, which requires correction by way of a petition under 37 CFR 1.182 (see MPEP 605.04(c)).

Accordingly, the PTO printing contractor will be instructed to print inventors' names on the Letters Patent exactly as the names are typed on the oath or declaration. For example, an oath or declaration with a printed inventor's name of Jonathan Hohenhauser Smithfield Williams, Jr., and a signature which is legible as Jonathan H. S. Williams, Jr., would have the Letters Patent printed with Jonathan Hohenhauser Smithfield Williams, Jr. as the inventor.

In order to have the PTO's records parallel as much as possible the above-noted changes, effective immediately, Application Processing Division will begin to enter into PALM (the PTO's computerized database) each inventor's name as printed or typed in the oath or declaration. Since the relevant fields in the PALM system for inventors' given names and last name are each limited to 25 characters, the example given above would be entered into the PALM system as Jonathan Hohenhauser Smit Williams, Jr. This PALM entry would be reflected on the filing receipt mailed to applicants. While the name 'Smithfield' would be truncated in the PALM system to 'Smit' as a result of the 25 character limitation, the printed patent will contain the full name as indicated above.

There is a time lag between the PTO printing contractor's receipt of an application to be issued as a patent and the patent's actual issue date. Therefor, patents issued on or after June 17, 1997, will contain the inventors' full names exactly as they are printed on the oath or declaration.

In all applications filed on or after April 18, 1997, applicants are cautioned to give their full names in the oath or declaration exactly as they would like them to be printed on the Letters Patent. In applications filed before April 18, 1997, if applicants do not desire to have their full names printed on the Letters Patent as they are printed or typed in the oath or declaration (at least one given name must be typed or printed in full), they must either: (1) request correction at the time of payment of the issue fee; or (2) if the issue fee has been paid prior to April 18, 1997, request correction, as soon as possible, by writing to Box Issue Fee, Assistant Commissioner for Patents, Washington, D.C. 20231. The requested correction will be made if sufficient time remains for the PTO to complete technical preparation of the text to be printed on the Letters Patent.

**37 CFR § 1.47 Notice by Publication**

Notice is hereby given of the filing of the following applications with a petition under 37 CFR § 1.47 requesting the acceptance of the application without the signature of all inventors or, if the inventor is deceased, the legal representative of the deceased inventor. The petition in each application has been granted. A notice has been sent to the last known address of the non-signing inventor or legal representative. The inventors or legal representatives whose signatures are missing may join in the application by promptly filing an oath or declaration complying with 37 CFR § 1.63.

## Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
